

Emerging Trends in Curriculum and Teaching

Globalization, technological innovation, and demographic changes are creating both new demands and opportunities. What is required is the capacity to think across disciplines, connect ideas and “construct information”. Hans and Crasta, 2019). It has, therefore, become imperative to deconstruct and reconstruct curriculum practices and philosophies and realign pedagogical trends in the light of 21st century skills and contemporary developments. Teachers need to deskill, reskill and upskill themselves in order to meet the challenges of current times and create opportunities in classrooms for learners to reap the maximum benefits.

This online workshop will make teachers aware of the new trends in curriculum and teaching and discuss innovative pedagogical ideas which can be incorporated into teaching to ensure effective learning outcomes. It will also share a few skills and attitudes that will help teachers to make this transformational leap and reimagine their roles in classrooms.

Dr Fatima Rehan Dar works as CEO and Managing Partner, Oak Consulting. Oak Consulting is a consulting firm that offers services in areas of educational reforms, trainings and research. Dr Dar holds a PhD in Education from School of Education and Cognitive Sciences, Asia e University, Malaysia, an M.A. in Curriculum and Teaching from Columbia University, USA and an MA in English from Government College University, Lahore (PAK).

Dr Dar is a senior professional with 27 years of experience in teacher education, curriculum development, professional training of teachers and research. She has been associated with the education departments of various academic institutions including SZABIST, Beaconhouse National University, Aga Khan University, Iqra University, Karachi, IOBM, Karachi, Virtual University, Lahore and Ali Institute of Education, Lahore. She also served as Team Lead, Monitoring, Evaluation and Research on the USAID funded Sindh Capacity Development Project and has been adviser and lead consultant with various international agencies including DFID, Mckinsey, Adam Smith International, World Bank and JICA. She is also working in an advisory capacity with the Federal Ministry of Education and Professional Training and Public-private partnership Node, Government of Sindh. She is also involved as a Technical Advisor with UNICEF and The Citizen's Foundation on language based projects in Balochistan and Sindh respectively. Her national and international featured talks at seminars, conferences and her publications touch upon contemporary issues in education, English Language Teaching and curriculum and also present plausible solutions to the standing concerns in education in Pakistan.
