

# Mastering Inferential Reading: Unlock the Power of Comprehension

Inference, the process of drawing logical conclusions from known or assumed premises, is a crucial aspect of successful reading comprehension. Extensive research in metacognition, neuroscience, and linguistics has been conducted to validate our understanding of the inferential process in reading. Despite a lack of popularity in reading culture in our context, learners often struggle to discern implicit meanings within text. This workshop aims to underscore the significance of surface and deeper levels of reading, stressing the importance of reader interpretations and the skill of reading between the lines. Furthermore, it will assist English teachers in devising strategies to enhance learners' proficiency in deeper reading. For instance, participants may engage in reading a story, pausing at intervals to contemplate the inferences they draw, thereby fostering a more comprehensive understanding of the text.

**Bushra Pasha** completed Masters in Applied Linguistics and English Literature from the University of Karachi. Currently, she is pursuing an MPhil. in ELT and Applied Linguistics. Determined to improve the teaching and learning standards in Pakistan, she has worked extensively in the education development sector across Sindh. She has been associated with teachers' professional development for a considerable time and has trained English teachers all across Sindh.

**Day:** Saturday

**Date:** December 30, 2023

**Time:** 12:00 to 01:00pm

**Fasih Raza**

Associate Chair, Professional Development  
Council (2022-24)
