

The 21st Century Classroom

TARGET AUDIENCE: All Teachers, Coordinators, Principals and Heads

The 21st-century classroom must serve all students by creating a rigorous, respectful and collaborative learning environment. In a rapidly changing world where technology can generate answers to most of our questions, we need to shift our focus from knowledge to skill building.

In this workshop teachers will utilize visual thinking routines and reflection to learn how to develop the 21st-century skills. Collaboration, communication, critical thinking, and self-management will become the focus of discussion.

This 1.5 hour workshop will also equip English language educators with the pedagogical practices that enhance literacy, allow students to maximize their potential and take ownership of their learning.

Aliya Jafari is a constructivist educator and a professional learning coach, with 20 years of experience of teaching in public and private schools in the U.S, Egypt, India, Switzerland, Jordan and Pakistan. Aliya coaches teachers in pedagogy and classroom practice and offers her expertise in developing cutting-edge reading instruction.

A strong advocate for equity and student agency, Aliya wants to help children develop their full potential and live a choice-filled life. She believes this goal can be achieved through rigorous and high-quality instructional design and classroom practice.

Aliya founded Pangea: Learning without Borders to realize her mission to provide professional development to educators so that they can reach out to their learners, especially those facing learning difficulties, socio-economic instability or conflict.
