Reimagining Writing Classes

Writing is an integral part of language teaching. However, writing classes are often unimaginative, prescriptive and boring. The focus is closely tied to the curriculum, completing the course and excelling in examinations.

This webinar, Reimagining Writing Classes focuses on teaching students to write through creative and well-thought-out strategies and exercises. The goal is to help students find their voices, discover a love for writing, and write about things that matter to them, to their families and communities and to the world around them.
